

I am a long-standing resident of East Sheen and a semi-retired chartered civil engineer and town planner specializing in transport planning and development matters in the UK and abroad.

I am concerned that the Local Plan as currently worded does not commit sufficiently and consistently enough to the implied intentions of "sustainable transport". This applies both generally and specifically to SA 24. In this regard I wish to refer inter alia to paras. 7.1.7 and 7.1.13 in the LP.

I am an independent consultant but advise both the Mortlake Brewery Community Group and the Mortlake and East Sheen Society on transport matters. I am the national vice chairman of the Institution of Civil Engineers Expert Panel on Transport and a Director of the Transport Planning Society. I am the independent chair of the Stratford Transport Implementation Group in East London.

Your Faithfully,
