This is to register my objection to the idea of buildings being built in Station Road, Teddington of mid-rise height. I understand this could mean 5 or 6 storey buildings. There have been plans submitted before for buildings of 3 storeys and those have been rejected as unsuitable for the location. Particularly the Garden Centre. I am not sure why this is now acceptable. This is a quiet residential street on one side. The impact of any new buildings of any height more than the existing buildings will affect everyone already in the road. There will be a loss of light in the evenings and a very great impact on the visual aspect of the road. The business park is a very well shielded development. And as parking is very difficult in this area, I am sure the development will increase this problem. Please do not approve this change to this area. It will impact everyone in Station Road. Thank You
Christine Knight. A long term resident [REDACTED]
